### 8.4 Políticas de inversión

Durante el mes de febrero 2024 el DANE reportó una inflación total para agosto de 2023 de 11.43% anual (vs. 11.78% mes anterior), mientras que la inflación mensual se ubicó en 0.70% (vs. 0.50% mes anterior). Las divisiones de gasto que contribuyeron en mayor medida al resultado anual fueron alojamiento, agua, electricidad y gas (+2.64pp), transporte (+2.40pp) y los alimentos y bebidas no alcohólicas (+1.87pp). En particular, para agosto de 2023 la inflación de alimentos se ubicó en 12.46%

(vs. 13.19% mes anterior) continuando con la tendencia a la baja en lo corrido de 2023. Por su parte, al igual que la inflación total, los indicadores de inflación básica continuaron con una tendencia negativa, así, la inflación sin alimentos se ubicó en 11.19% anual (vs. 11.45% mes anterior) y en 0.60% mensual (vs. 0.57% mes anterior) en medio de un sector servicios que ha continuado con un crecimiento importante.

Al igual que el mes anterior, este resultado sorprendió al alza las expectativas de los analistas económicos quienes esperaban una inflación anual de 11.15% para este periodo. Luego del resultado, las expectativas de inflación implícitas del mercado de deuda pública (TES) corrigieron al alza tanto a corto como a mediano y largo plazo.

Con los recientes datos de inflación, esperamos que para cierre de 2023 la inflación total anual se ubique en 9.4%, y para cierre de 2024 en 5.1%. El precio de los alimentos en los últimos dos meses ha impactado las expectativas de inflación al mediano y largo plazo y continúan por fuera del rango objetivo del Banco de la República. En términos de política monetaria, esperamos que el Banco de la República haya culminado su ciclo de incrementos en la tasa de intervención y esta se mantenga inalterada en 13.25% hasta principios del cuarto trimestre del año. Para cierre de año, en medio de una moderación en el ritmo de crecimiento de la demanda interna y el ajuste consecuente en los indicadores de inflación básica, permitiría al Banco de la República comenzar su senda de recortes a partir del cuarto trimestre del año donde cerraría 2023 en 12.75% y 2024 en 8.00%.

Por otro lado, un informe de JP Morgan advirtió que, luego del retiro de Ecopetrol del índice MSCI Colcap en noviembre de 2022, las acciones colombianas están al borde de no cumplir con el umbral de liquidez de MSCI lo que podría llevar a una reclasificación de mercado emergente a mercado de frontera lo cual agravaría aún más las desvalorizaciones considerables que ha registrado el mercado accionario colombiano. Luego de conocerse el informe el MSCI Colcap cerró la jornada con 1.051,18 puntos marcando una caída del 2.45% respecto al cierre del día anterior y registrando un mínimo de 3 años.

A nivel regional, el Banco Central de Chile continuó con los recortes en su tasa de intervención pasando de 10.25% hasta el 9.50%, recorte superior a lo esperado por el mercado. En particular, el inicio del ciclo de recortes en la región sumado a la valorización del dólar a nivel internacional se ha visto reflejado en una desvalorización de las monedas regionales del 3.0% en promedio en contraste con la apreciación que habían registrado en el primer semestre del año.

A nivel internacional, en Estados Unidos, la inflación total para agosto se ubicó en 3.7% anual (vs. 3.2% mes anterior), lo cual representó una sorpresa al alza para el mercado. Adicionalmente, la inflación básica- sin alimentos y energía- registró un aumento de 4.3% anual (vs. 4.7% mes anterior) lo cual refleja los excesos de demanda en la economía estadounidense de la mano con el dinamismo en el mercado laboral. En particular, para el mes de agosto, se crearon 187.000 nóminas no agrícolas en comparación con las 170.000 esperadas por el mercado con lo cual la tasa de desempleo continúa en mínimos históricos a pesar el incremento registrado en agosto donde aumentó del 3.5% al 3.8%.

Adicionalmente, el Banco Central Europeo (BCE) continuó con los incrementos en la tasa de política pasando de 4.25% al 4.50%, superior a lo esperado por el mercado. En particular, el BCE redujo sus pronósticos de crecimiento económico para el bloque donde esperan un crecimiento de 0.7% en 2023 y 1.0% en 2024, aun así, el emisor ha mantenido su determinación por regresar la inflación a la meta del 2% en el mediano plazo teniendo en cuenta los riesgos al alza que aún permanecen.

A nivel local, según el DANE, el Indicador de Seguimiento a la Economía para el mes de julio registró un crecimiento de 1.2% en comparación con julio de 2022. En particular, el sector de administración pública, salud y educación registraron un crecimiento anual de 8.9% seguido por las actividades financieras (+3.3%) y la agricultura (+2.2%). En contraste, el sector del comercio registró una contracción de 2.7% y completa 5 meses consecutivos de caídas sumado a la desaceleración registrada en el sector de la construcción e industrias manufactureras que registraron una caída de 5.2% en el periodo.

A nivel internacional, el Banco Central de Brasil continuó con su ciclo de recortes en la tasa de política pasando de 13.25% a 12.75% en línea con lo esperado por el mercado. Por su parte, la Reserva Federal decidió mantener inalterada su tasa de fondos federales en 5.50% en línea con lo esperado por el mercado, y prevé una tasa de política inalterada en 5.6% a cierre de 2023 mientras que para cierre de 2024 la mediana aumentó de 4.6% a 5.1%. Sumado a la Reserva Federal, el Banco de Inglaterra decidió mantener inalterada su tasa de política en 5.25% en contraste con el incremento de 25 puntos básicos que esperaba el mercado.

Por su parte, se conoció que la inflación anual en la Eurozona para el mes de agosto fue de 5.2% (vs. 5.3% mes anterior), mientras que la inflación básica se ubicó en 5.3% (vs. 5.5% mes anterior). En la región la principal contribución a la inflación ha sido por cuenta de los servicios (+2.4 puntos porcentuales) seguido de los alimentos (+1.9 puntos porcentuales) y los bienes industriales no energéticos (+1.2 puntos porcentuales).

A nivel local, la Junta Directiva del Banco de la República (JDBR) decidió por mayoría mantener la tasa de intervención inalterada en 13.25% en línea con lo esperado por el mercado. Por su parte, la junta resaltó que el mantenimiento de una postura contractiva ha permitido la moderación de los excesos de demanda y el crecimiento económico, así como un ajuste gradual del déficit de cuenta corriente. No obstante, los indicadores de inflación actuales contrastan con la tendencia regional en parte por la presión del sector servicios en la economía. En particular, la JDBR recalcó que de adaptarse una posición expansiva de forma prematura se podría correr el riesgo de tener que revertirla más adelante, esto en contraposición con los dos codirectores que votaron por comenzar el ciclo de recortes en la tasa con un primer recorte de 25 puntos básicos.

# Descripción

## Descripción de Portafolio

Sumar es una alternativa de inversión a la vista con perfil de riesgo conservador que se encuentra calificada por BRC Standard & Poor's con AAA/2 por su alta calidad crediticia y su baja sensibilidad ante la volatilidad del mercado.

El objetivo de inversión del Fondo es la conformación de un Fondo de Inversión Colectiva con recursos a la vista ofreciendo a los inversionistas una alternativa de inversión con perfil de riesgo bajo y conservador, tendiente a la conservación de capital y a la obtención de rentabilidad de acuerdo con las condiciones del mercado.

## Gestión Del Portafolio

El portafolio se encuentra invertido en títulos de renta fija local, tasa fija o indexada IPC e IBR, con vencimientos de corto plazo que actualmente promedian los 240 días.

A nivel internacional, en Estados Unidos, la inflación total para agosto se ubicó en 3.7% anual (vs. 3.2% mes anterior), lo cual representó una sorpresa al alza para el mercado. Lo anterior confirma una leve aceleración en el ritmo inflacionario en medio de la estabilización en el precio de la energía y los alimentos en el mundo.

La TIR del portafolio se ubica en niveles relativamente altos, desde marzo de 2017, lo que contribuye positivamente a la estabilización de la rentabilidad del FIC y promueve una recuperación más rápida de los retornos en períodos de menor volatilidad del mercado.

## Conclusiones

A nivel local, la Junta Directiva del Banco de la República (JDBR) decidió por mayoría mantener la tasa de intervención inalterada en 13.25% en línea con lo esperado por el mercado. Por su parte, la junta resaltó que el mantenimiento de una postura contractiva ha permitido la moderación de los excesos de demanda y el crecimiento económico.

La JDBR recalcó que de adaptarse una posición expansiva de forma prematura se podría correr el riesgo de tener que revertirla más adelante, esto en contraposición con los dos codirectores que votaron por comenzar el ciclo de recortes en la tasa con un primer recorte de 25 puntos básicos.

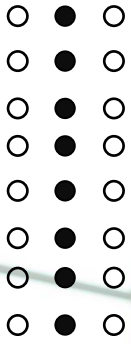

Las obligaciones de la fiduciaria son de medio y no de resultado.

La TIR del Fondo Sumar, que es el promedio de la tasa de valoración de los activos que conforman su portafolio, se ubicó en 14.10 para el cierre de septiembre, 57 p.b. por debajo del mes anterior, lo cual indica un mejor dinamismo del fondo en el mercado.

La rentabilidad neta mensual del Fondo Sumar para el cierre del mes de septiembre se ubicó entre 10.36% E.A. y 12.85% E.A. según cada tipo de participación.
